

7711 2 GHz 50 Ω RF Module

Datasheet

The 7711 plug-in module provides an economical, wideband signal routing solution that complements the DC/low frequency switching and measurement capability of the Integra Series 7700 Switch Modules. The 7711 offers dual 1×4 configurations and can interface with a wide range of external AC instruments, including oscilloscopes, pulse generators, and signal analysis tools. One channel in each multiplex bank is always closed to the corresponding OUT connector. All connections are easily accessible from the rear panel.

Key Features

- Signal routing performance to 2 GHz
- Switches up to 60 VDC
- Rear panel SMA connections
- Onboard switch closure counter
- Onboard S parameter storage
